

VANSH CHOUDHARY

Aspiring Software Development Engineer

+91 9718434318 | VanshChoudhary5600@gmail.com | linkedin.com/in/vanshchoudhary56 | github.com/VanshChoudhary7 | Portfolio

SUMMARY

Aspiring Software Development Engineer with hands-on experience in full-stack web development, open-source contribution, and cybersecurity. Proficient in React.js, Node.js, Python, and Java. Proven ability to build scalable applications, collaborate in agile teams, and deliver secure, user-focused software solutions.

EDUCATION

Guru Gobind Singh Indraprastha University

B.Tech in Computer Science & Engineering

Sept 2024 - Sept 2028

• CGPA: 8.02 / 10.00 (till 4th semester)

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript

Web & Frameworks : React.js, Node.js, HTML5, CSS3, RESTful APIs

Databases: MySQL, MongoDB, SQL, NoSQL

Tools & Platforms: Git, GitHub, VS Code, Docker, Linux

WORK EXPERIENCE

Co-Head | CyberSurge — College Cybersecurity Society

Mar 2025 – Present

- Led security - focused initiatives , organized CTF competitions and technical workshops, and mentored peers in ethical hacking and cybersecurity fundamentals.

Cyber Warrior Intern | Gurugram Police

Jun 2026 – July 2026

- Contributed to PhishGuard — a ML -assisted phishing URL detection system — through testing, validation, and cybersecurity awareness programs.
- Applied knowledge of web security , phishing attack vectors , and cyber security best practices in a real-world law enforcement environment.

Open Source Contributor | GirlScript Summer of Code (GSSoC)

Jul 2025 – Sep 2025

- Resolved bugs and improved components across multiple open-source repositories; collaborated with maintainers via pull requests and code reviews.
- Followed structured contribution workflows using Git and GitHub, strengthening version control and collaborative development skills.

PROJECTS

TradeFlow— Full Stack Trading Platform

- Built a full-stack trading platform with React.js frontend and Node.js/RESTful API backend, enabling real-time portfolio management and market data visualization.
- Implemented JWT-based user authentication, transaction tracking, and scalable MongoDB database architecture to handle concurrent user activity securely.

PhishGuard — AI-Powered Phishing Detection Platform

- Built an AI-powered phishing detection platform using React.js, Python (Flask), and Machine Learning, enabling real-time analysis of suspicious URLs and phishing websites.
- Implemented URL feature extraction, ML-based threat classification, and an intuitive dashboard to provide phishing risk prediction and improve cybersecurity awareness through an interactive user experience.

Memory Master — Simon Says Game

- Developed an interactive browser-based game using HTML, CSS, and JavaScript featuring dynamic sequence generation, level progression, and real-time DOM event handling.

ACHIEVEMENTS

- Secured 3 rank among 50+ Team in College Level Hackathon for **Smart India Hackathon (SIH)**.
- Solved 100+ Data Structures and Algorithms problems across **LeetCode** and **CodeForces**.
- Selected as Management Team Head at CyberSurg Tech Society based on technical and leadership skills.

CERTIFICATIONS

- Microsoft Certified: **Azure AI Fundamentals (AI-900)** — Core AI/ML concepts, Computer Vision, NLP, Generative AI, Responsible AI, Azure AI Services.
